

Madheshwarr MM

Auckland, New Zealand • 022 396 2659 • madheshwarr.mm@gmail.com

Software QA professional with 3 years of experience across manual and automation testing, backed by an ISTQB certification and a Master's qualification from New Zealand. Experienced across the software testing lifecycle, Agile delivery and quality-focused software releases, with research expertise in Generative AI and a strong interest in AI-assisted testing and modern QA practices. Collaborative and adaptable, with a focus on continuous learning and delivering reliable, high-quality software. Seeking an opportunity to contribute my testing experience while growing within a forward-thinking technology team.

WORK EXPERIENCE

Virtusa Consulting Services

Associate Software Engineer – Software Quality Assurance

May 2022 – Jul 2024

- Gained competencies as an on-the-job trainee in the basics of Java, SQL databases, and foundations of STLC and automation frameworks.
- Responsible for implementation of the automation framework, Page Object Model using Selenium WebDriver and Java, TestNG, Maven and Java and the banking system.
- Supported quality assurance activities across web-based applications, performing functional, regression, integration and end-to-end testing to ensure reliable software releases.
- Executed rigorous end-to-end automation testing of complex UI workflows, validating critical business logic and data integrity across multiple release cycles.
- Partnered cross-functionally with developers, business analysts, and Scrum Masters within an Agile/Scrum environment, contributing across the full sprint lifecycle planning, stand-ups, demos, and retrospectives within structured 4-week sprint cycles.
- Reduced manual regression effort by approximately 40% through targeted test automation, improving test coverage, release efficiency, and overall confidence in software quality.

Delivery Intern – QA Engineer

Sep 2021 – Apr 2022

- Led and coordinated a cross-functional internship project team comprising Business Analysts, Developers, and Testers, overseeing task allocation, progress tracking, team communication, and project reporting to support successful delivery within the internship timeline.
- Developed practical knowledge of software testing methodologies, including test planning, test strategy, test case design, test execution, and defect reporting.
- Tested the Airline ticket booking application as per the requirements which was developed by the internal developers.
- Designed the Test Scenarios and test cases as per the project requirements. Executed the test cases manually with the required input data in multiple web browser.

EDUCATION

Master of Applied Technologies – Computing

Unitec • Auckland, New Zealand

Jul 2024 – Feb 2026

Bachelor of Technology – Information Technology

Anna University • Chennai, India

Aug 2018 – May 2022

CERTIFICATIONS

ISTQB Certified Foundational Level Software Tester

Apr 2022

NPTEL Certification in Software Testing

Sep 2020

PROJECTS

The Impact of Generative AI on Software Testing: A Qualitative Exploration

Feb 2025 –
Nov 2025

- Conducted a qualitative study and interviewed 17 New Zealand testing professionals, from Test Engineers to Managers, gaining practical insights into GenAI adoption and its applications across test generation, automation, defect analysis, documentation and human-AI collaboration.
- Developed a strong practical understanding of AI-assisted testing and the evolving QA landscape, including how tools such as ChatGPT, GitHub Copilot, Claude and other GenAI solutions can support testing workflows, while recognising their limitations, risks and need for human validation.

VOLUNTEERING & LEADERSHIP

International Student Connector

Unitec

Jan 2025 – Nov 2025

- Led and coordinated student teams across campus events and orientation activities, gaining hands-on experience in event planning, team coordination and working with New Zealand's diverse multicultural community.
- Supported new and international students through peer engagement and issue resolution, while contributing ideas to improve student experience, team initiatives and social media engagement.
- Organised and delivered presentations and spoke at student events, developing strong public speaking, interpersonal communication and audience engagement skills.

CONFERENCES & PRESENTATIONS

ITP Research Symposium 2025 – Research Presenter

Nov 2025

Selected to represent Unitec Institute of Technology at the 2025 ITP Research Symposium following peer review of my research, and presented the findings to an academic and industry audience.

Three-Minute to Impact – Research Presentation

Oct 2025
